COLORED-BODY PORCELAIN TILES - RECTIFIED, ONE CALIBER

Colored-body porcelain stoneware tiles are produced minimizing the color difference between the glaze and the body. Nevertheless, the design is visible only on the surface.

For information about installation and cleaning of Caesar products, please consult our general catalogue or the website www.caesarceramicsusa.com.

Color reproductions may vary from actual products.

Caesar reserves the right to modify the products illustrated in this catalogue for reasons of production or to improve quality. Samples are purely indicative. Packaging and weights may vary for production reasons. Contact our sales department when ordering.

In case of running pattern installation, Caesar recommends a maximum 33% offset.

Caesar warrants that our products meet or exceed the requirements of ANSI, specification ANSI A137.1: 2012, as shown in our Tile Performance Data sheets.

FOCUS

CUTTING-EDGE TECHNOLOGY
Cutting-edge technology: the best quality and aesthetic performance.

INSPIRED BY TOP QUALITY WOOD
Whisper captures and reproduces the appearance of authentic wood in the best manner possible while eliminating defects and imperfections.

WEAR RESISTANT EASY CLEANING
Top quality porcelain stoneware has excellent resistance to wear and scratching, stain-proof, easy to clean and perfectly sanitizable.

CAPTURING NATURE’S VARIETY IN HARMONY
The tiles have a particularly diverse appearance. Installed surfaces boast a natural and attractive variability.

WOOD AND STONE EFFECT
Whisper has an elegant and subtle look and can be matched with other surfaces, materials and colors with the utmost ease.

CLEAR NATURAL DETAILS
The presence of details and distinctive features of wood give the installed floor a great feeling of authenticity.

WEAR RESISTANT EASY CLEANING
After 36/48 hours, when both the floor and the grouts have completed their first drying phase and before the real phase of the floor has yet to begin, it is necessary to proceed with the cleaning of the tiled surface using a “padding” action acid detergent, diluted according to the manufacturer’s instructions.

• For areas heavily stained with grout, it is necessary to repeat this operation once or twice, increasing the percentage of water.

• The excess grout residue must be removed so that it does not dry and stick on the surface. It is necessary to change the cleaning water frequently and rinse well.

• Care must be taken on inlayed, polished and anti-slip products; for the latter in particular, the use of a floor-washing machine combined with the action of an acid detergent helps reach the spaces between adjacent tiles and clean them properly.

• If such a cleaning procedure is not carried out, or if such cleaning is carried out too late, the grout residue creates an extremely absorbent film, which holds dirt, making the surface difficult to clean; in this case, Ceramiche CAESAR S.p.A. will not be liable for any damage caused to the surface.

• We would like to remind you that porcelain stoneware is a product with excellent technical features which allow for high grade of mechanical wear and resistance to acids (except for hydrofluoric acid and its derivatives) and alkalis, features which are added to a high aesthetic quality.

• Ordinary maintenance must be carried out using specialist detergents to remove stains but these detergents must not leave a wax, film or membrane residue.

• Rinsing well with plenty of clean water is a fundamental part of the cleaning procedure, therefore we advise against the use of products which state that they “do not need rinsing”.

• For more detailed and updated information, please consult the website www.caesarceramicsusa.com, or contact our sales department.
Maximum concern for the environment

From our plant ....

The brand new production facilities in the USA are built in compliance with the most stringent standards in term of environmental protection, safety of workers and reduction of energy consumption.

LEED
(Leadership in Energy and Environmental Design)

Caesar Ceramics USA is a member of US Green Building Council (USGBC).
The LEED program, promoted by the USGBC, is the most widely used green building rating system in the world. Available for virtually all building, community and home project types, LEED provides a framework to create healthy, highly efficient and cost-saving green buildings.

HPD
(Health Product Declaration®)
The Health Product Declaration (HPD) Open Standard provides for the disclosure of product contents and potential associated human and environmental health hazards. By means of its declaration, Caesar USA adheres to the standard.

YOU CARE

By choosing Caesar Ceramics USA, the end user will be sure to purchase durable, safe and green floor and wall tiles: being extremely durable, they do not call for any chemical treatment, varnish or special detergent. They do not release dust or other substances, even when subject to high pedestrian traffic.

Average values referred to the last two years of production and related to the matte finish of the product. Values relate to the matte finish of the product and to tests carried out by certified external laboratories, whose results are available upon request. Be sure to use the same caliber tiles. Color reproductions may vary from actual products.

* Due to the intrinsic nature of porcelain stoneware tiles, please note that the coefficient of friction may vary within the same production lot or from one production lot to the other. Caesar products can become slippery when wet. We recommend to always keep the surface dry.
